INTRODUCTION:

The Tanzania Roads Association (**TARA**), which is also a National Committee of the World Road Association (**PIARC**) in collaboration with the Ministry of Works in Tanzania through the Tanzania Transportation Technology Transfer (**TanT²**) Centre with Tanzania National Roads Agency (**TANROADS**), Tanzania Rural and Urban Roads Agency (**TARURA**), the Roads Fund Board in Tanzania and other local and international institutions, is organizing the **Training on Management of Construction Project Contracts for Transport Infrastructures** to be held from **20th – 25th April 2026** at **Morena Hotel, Morogoro, Tanzania**.

Training Background

Tanzania and other African nations face significant challenges in transport infrastructure contract management, primarily driven by severe funding shortages, delayed payments, and weak institutional capacity. Key obstacles include corruption, inadequate technical expertise, bureaucratic procurement processes, and poor risk management leading to frequent cost overruns and project delays.

Key Challenges in Construction Project Contracts:

- **Financial Constraints:** Heavy reliance on donor funding and lack of local capital often led to delayed payment to contractors, causing work stoppages and project.
- **Weak Contract Administration:** Inadequate capacity of local consultants and contractors, combined with poor supervision, results in substandard quality and safety issues.
- **Procurement & Bureaucracy:** Slow, bureaucratic procedures and corruption in procurement processes severely hinder project implementation.
- **Technical and Human Capital Gaps:** A critical shortage of skilled professionals (engineers, technicians, and artisans) restricts the ability to manage complex infrastructure project effectively.
- **Project Inefficiencies:** Common issues include substantial cost overruns, long delays in land acquisition, and poor design changes.

These factors frequently result in delayed project completion and escalated costs, impacting the overall development of transport networks in Tanzania and the broader region.

This Six Days Intensive Training offers participants an in-depth exploration of modern theories, knowledge, technologies and best practices in Management of Construction Project Contracts for Transport Infrastructures using FIDIC contract standards tailored for roads, rail, aviation, and port project. Participants will gain insights into the pivotal role of construction in the project delivery lifecycle, enhanced through real-world examples and case studies. The curriculum emphasizes a reliable project delivery methodology, equipping delegates with key methods, tools, and techniques employed by leading companies and experts in the field. Additionally, the program will cover topics on EPC Contracts and Project Financing, offering a comprehensive understanding of critical aspects in Management of Construction Project Contracts.
